

Greetings everyone ,

We ,Team Les Débouqueurs, have picked upon a project on Integrated Store Management which helps small and medium sized businesses to efficiently manage themselves and also scale up above their standards. It also allows them to analyse the market trends and grow their businesses.

The logo consists of the first 3 letters of the project name and its colour scheme of pink and white reflect upon the ideals of peace and service.

The User Interface of the website is kept minimal so that any person without much technical knowledge can operate it.

We have matched the colour of the pages with the official colours of the project - pink,blue and white. The shades of colours have been kept such that it doesn't strain the eyes.

The pages have been designed with a theme code reflected in the redirecting pages with the options.

Overall we have tried to create an easy to use interface for the user.
